a Expert score distribution across models, tasks and dimensions

One expert | Nine seen development tasks | User-corrected scores

Ribbon width = awarded score points. Model to question: four-dimension total (0-8); question to dimension: item score (0-2).

Color retains model identity across all three columns. Zero-score links have zero width and are omitted; all scores remain in the data.

Q1-Q4: standard tasks | Q5: requirement change | Q6-Q9: reliability | Source: user-confirmed expert sheet, GitHub c68baaf
