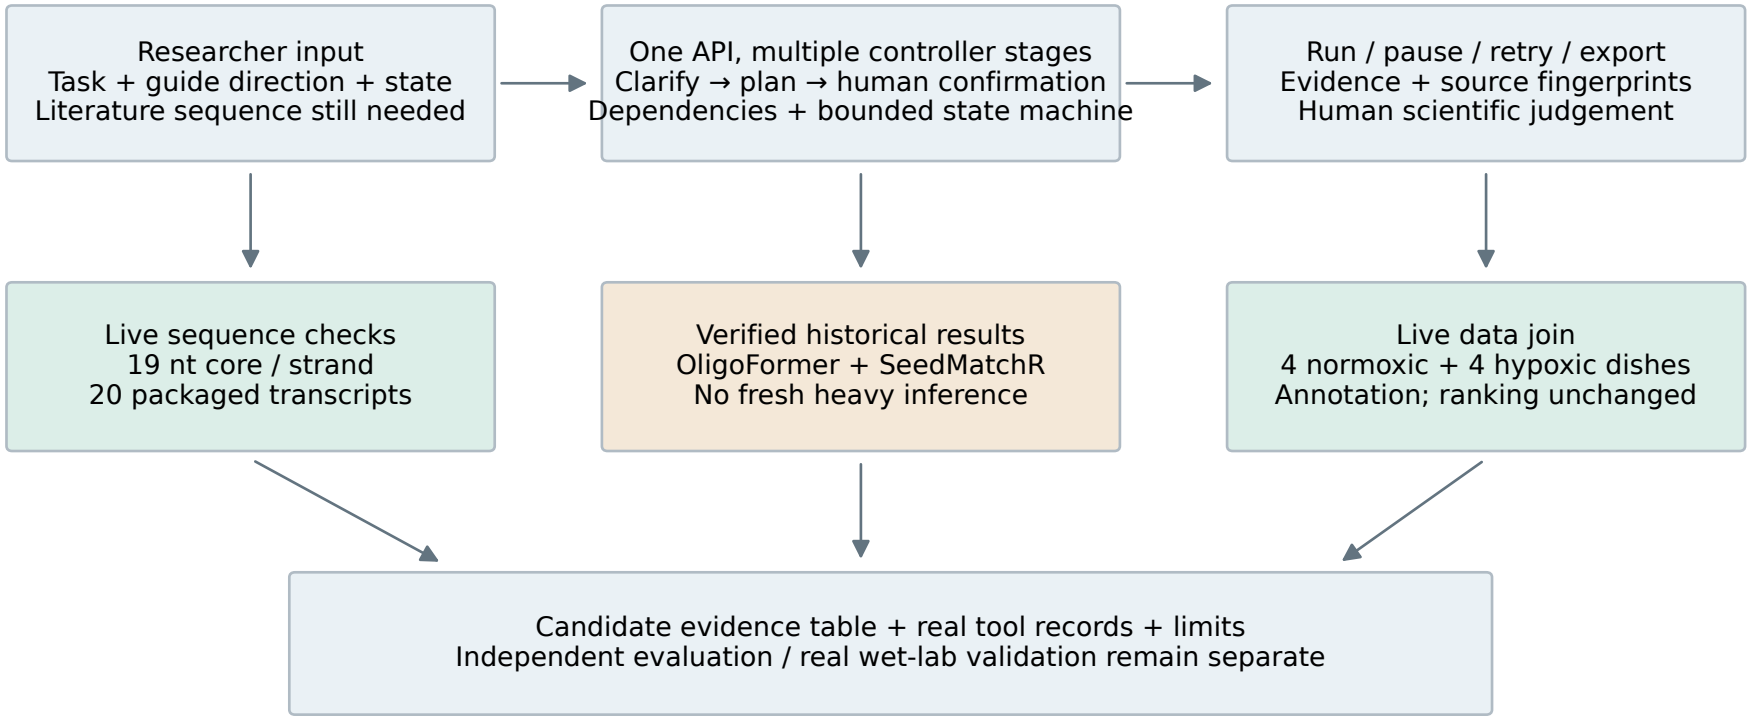
a

Adapted workflow: human VEGFA / ARPE-19



b

Migration scope from CRISPR-GPT

Source-paper concept	This project	Evidence boundary
Meta / Auto / Q&A	Implemented	Single API + controlled tools
Planning / tool evidence	Real Auto archived	Six tools; mixed live checks and imports
Benchmark / expert review	Development only	6 tasks × 3 arms × 3 technical repeats
Fine-tuning / wet lab	Not performed here	No equivalence to the full source system
