b Expert scores ranked within each model

Nine seen tasks per configuration | One expert | User-corrected Q9 scores

Agent

n = 9; mean = 7.78 / 8

Fixed workflow

n = 9; mean = 5.67 / 8

LLM

n = 9; mean = 5.78 / 8

Bars show all nine original question totals per model, sorted independently; question IDs retain the pairing.

Color continuously encodes the original score; no high/low-quality or noise thresholds are inferred. Source: GitHub c68baaf.
